Mediolanum International Funds Limited (part of the Mediolanum Banking Group) is the Manager of the Fund.

## Objectives and Investment Policy

- The Sub-Fund's objective is to achieve medium long term capital growth.
- The Sub-Fund invests primarily in global (including emerging market) fixed income securities (such as bonds issued by companies or governments), equities (listed shares) and equity related securities.
- The Sub-Fund may use financial derivative instruments (FDIs) whose performance is linked to that of underlying security(s) or asset class(es).
- The Investment Manager uses a flexible approach to allocate and adjust the Sub-Fund's asset allocation (% of the portfolio invested in equities/bonds/FDIs etc) to create a portfolio which it believes will offer, at any given time, the best opportunities for capital growth over a medium-long term investment horizon.
- The fixed income securities held may be investment grade (Standard & Poor's (or equal) credit rating of BBB- or better), rated below investment grade or unrated.
- The Investment Manager has discretion in managing the investments of the Sub-Fund.
- FDIs are used to remove the impact of exchange rate movements (hedging) which may affect the value of these Classes of Units.
- Income and gains generated by the LHB Class and SHB Class of Units will be distributed periodically in the form of a dividend.
- All income and gains generated by the LHA Class and SHA Class of Units will be reinvested. No dividends will be paid.
- Units can be bought or sold on any business day from the Fund's Administrator.
- Please refer to the Prospectus and Sub-Fund Information Card for more detailed information.

## Risk and Reward Profile

- The risk category is based on historical data and may not be a reliable indication for the future.
- It is not guaranteed and may change over time.
- The lowest category does not mean 'risk free' investment.
- The Sub-Fund is classified in the risk category above due to the nature of its investments. The risk level is measured by the volatility of the Sub-Fund's past returns (or from the past returns of a suitable model portfolio if a full 5 year history is unavailable).

**The following risks are considered material and may not be fully captured by the risk and reward indicator:**

- Non-Investment Grade fixed income securities are more sensitive to changes in interest rates and present greater Credit Risk than higher rated fixed income securities.
- Financial Derivative Risk - FDI values may rise and fall at a greater rate than underlying securities or instruments. Some derivatives may result in gains or losses that are greater than the original amount invested.
- This Sub-Fund has the ability to pay dividends from capital which will have the following effects (i) capital will be eroded, (ii) distribution is achieved by forgoing the potential for future capital growth and (iii) the cycle may continue until all capital is depleted.
- Liquidity Risk - The risk that a given security in the Sub-Fund may not be traded quickly enough to prevent a potential loss.

A complete description of risk factors is set out in the Prospectus of the Fund in the section entitled 'Risk Factors'.
