## Risk and Reward Profile

Lower Risk ← Higher Risk  
Typically lower returns      Typically higher returns

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The risk category is based on historical data and may not be a reliable indication for the future.
- It is not guaranteed and may change over time.
- The lowest category does not mean 'risk free' investment.
- The Sub-Fund is classified in the risk category above due to the nature of its investments. The risk level is measured by the volatility of the Sub-Fund's past returns (or from the past returns of a suitable model portfolio if a full 5 year history is unavailable).

**The following risks are considered material and may not be fully captured by the risk and reward indicator:**

- **Credit Risk** - The issuer of a fixed income security held within the Sub-Fund may not be able to meet its obligations, even partially, to the Sub-Fund. Downgrades of an issue or issuer credit rating may lead to a loss in the value of bonds.

A complete description of risk factors is set out in the Prospectus of the Fund in the section entitled 'Risk Factors'.
