Risk and Reward Profile

- The risk category is based on historical data and may not be a reliable indication for the future.
- It is not guaranteed and may change over time.
- The lowest category does not mean 'risk free' investment.
- The Sub-Fund is classified in the risk category above due to the nature of its investments. The risk level is measured by the volatility of the Sub-Fund's past returns (or from the past returns of a suitable model portfolio if a full 5 year history is unavailable).

The following risks are considered material and may not be fully captured by the risk and reward indicator:

- **Counterparty Risk** - The risk that a counterparty will not fulfil their contractual obligations resulting in a potential loss to the Sub-Fund.
- **Financial Derivative Risk** - FDI values may rise and fall at a greater rate than underlying securities or instruments. Some derivatives may result in gains or losses that are greater than the original amount invested.

A complete description of risk factors is set out in the Prospectus of the Fund in the section entitled 'Risk Factors'.
