Mediolanum International Funds Limited (part of the Mediolanum Banking Group) is the Manager of the Fund.

Objectives and Investment Policy

- The Sub-Fund’s objective is to pay regular dividends and achieve medium-long term capital growth.
- The Sub-Fund invests in US fixed income securities (such as bonds issued by companies or governments), equities (listed shares) either directly or indirectly (by investing in funds).
- The Sub-Fund invests in funds which are selected following Investment Manager evaluation of: investment team strength, underlying investment process quality, opportunity for future capital growth and ability to pay dividends.
- The fixed income securities held may be investment grade (Standard & Poor’s (or equal) credit rating of BBB- or better), rated below investment grade or unrated.
- The Sub-Fund may use financial derivative instruments (FDIs) whose performance is linked to that of underlying security(s) or asset class(es).
- The Investment Manager has flexibility to change the Sub-Fund’s asset allocation (% of the portfolio invested in equities/bonds/FDIs etc) at any time and has discretion to select investments within each asset class.
- The Sub-Fund is appropriate for investors with a medium-long term investment horizon.
- FDIs are used to remove the impact of exchange rate movements (hedging) which may affect the value of these Classes of Units.
- Income and gains generated by the LHB Class and SHB Class of Units will be distributed periodically in the form of a dividend.
- All income and gains generated by the LHA Class and SHA Class of Units will be reinvested. No dividends will be paid.
- Units can be bought or sold on any business day from the Fund’s Administrator.
- Please refer to the Prospectus and Sub-Fund Information Card for more detailed information.

Risk and Reward Profile

- The risk category is based on historical data and may not be a reliable indication for the future.
- It is not guaranteed and may change over time.
- The lowest category does not mean 'risk free' investment.
- The Sub-Fund is classified in the risk category above due to the nature of its investments. The risk level is measured by the volatility of the Sub-Fund's past returns (or from the past returns of a suitable model portfolio if a full 5 year history is unavailable).

The following risks are considered material and may not be fully captured by the risk and reward indicator:

- **Credit Risk** - The issuer of a fixed income security held within the Sub-Fund may not be able to meet its obligations, even partially, to the Sub-Fund. Downgrades of an issue or issuer credit rating may lead to a loss in the value of bonds.
- **Non-Investment Grade fixed income securities** are more sensitive to changes in interest rates and present greater Credit Risk than higher rated fixed income securities.
- **Financial Derivative Risk** - FDI values may rise and fall at a greater rate than underlying securities or instruments. Some derivatives may result in gains or losses that are greater than the original amount invested.
- This Sub-Fund has the ability to pay dividends from capital which will have the following effects (i) capital will be eroded, (ii) distribution is achieved by forgoing the potential for future capital growth and (iii) the cycle may continue until all capital is depleted.

A complete description of risk factors is set out in the Prospectus of the Fund in the section entitled 'Risk Factors'.
